## Skills

**Languages & Technologies:** HTML, CSS, JavaScript, AngularJS, ReactJS, Bootstrap, Python, Django, Core Java, .NET, PHP.

**Databases:** MySQL, Neo4j.

**OS & Tools:** Linux, Windows, Docker, GitHub, Jira, Bitbucket, SVN.

## Work Experience

**Factech: Facility + Technology Solutions, Noida**

Mar 2023 – Present

### *FullStack Developer*

- **Frontend Development:** Spearheaded the redesign and enhancement of the main dashboard, optimizing UI/UX to significantly improve user engagement and overall system satisfaction.
- **Backend Development:** Developed and optimized APIs to enhance system performance, increasing speed and efficiency by streamlining backend processes.
- **Docker Implementation:** Led the transition to Docker, creating a unified environment by integrating services such as Apache, MySQL, Neo4j, and phpMyAdmin, which streamlined development and reduced error rates.
- **Mentorship and Team Support:** Managed and mentored new interns, providing guidance and support to ensure successful task completion and fostering their professional growth.

**Smart Solutions - Collaborative Supply Chains**

Dec 2022 – Mar 2023

### *Python (Django) Developer Intern*

- **UI/UX Enhancement:** Designed and implemented UI/UX improvements for a new project from inception, enhancing user experience and visual appeal through Google Charts for effective data representation.
- **Backend Development:** Developed Python functions to replicate Excel functionality, and managed database CRUD operations using Django, facilitating the creation of a user-friendly software solution for seamless decision making.

## Project Work

**Morse Code (Encrypt-Decrypt).**

[View](#)

- Developed a web application that enables users to **encrypt** and **decrypt** messages between English and Morse Code. Deployed on Netlify for seamless access and user interaction.

**Personal Diary Django Web App.**

[View](#)

- Created a fully responsive personal diary application with Django, featuring **user authentication** (login/signup), a dashboard displaying note statistics, and comprehensive **CRUD** operations. Implemented search functionality and password management, ensuring a robust and user-friendly experience across both mobile and desktop platforms.

## Education

**MSc in Computer Applications.**

2022 – 2024

VCACS, Pune

**CGPA:8.85 / 10**

**BSc in Computer Science.**

2019 – 2022

VCACS, Pune.

**CGPA:8.99 / 10**
